

Improved managability and overview with ROB-EX Gantt

A/S MIDTJYDSK BETON-vare & ELEMENTFABRIK is a private company with 60 employees. The company produces precast concrete units for the construction of industrial and residential buildings.

MORE THAN 40 YEARS OF EXPERIENCE

A/S MIDTJYDSK BETON-vare & Elementfabrik has more than 40 years of experience in the concrete unit production industry and carries out continuous development of their methods of production, so that they are able to match the demands and requirements of the national and international construction industries at any given time. The company is able to plan on all projecting bases, depending on the requirements and wishes of the individual customer. The highly competent employees fol-

“We are extremely pleased with the way ROB-EX™ Gantt allows us to optimise and to effect improvements in our daily production”

low up on the projects so that the concrete units are delivered to the satisfaction of the customer.

THE HEAD OF PRODUCTION STATES

Anders Sørup, the Head of Production at A/S MIDTJYDSK BETONvare & Elementfabrik states the following in relation to the investment in ROB-EX™ Gantt: “We tried to obtain an overview of

our ongoing operations by using an Excel Spreadsheet, but this was a complicated tool to work with and we also experienced serious blunders due to typing errors. This was why we decided to invest in ROB-EX™ Gantt with integration to Dynamics NAV which meant that we could avoid having to key in data twice – something that has clearly minimised the number of errors in our planning.

A CLEAR GRAPHIC OVERVIEW

With the new system we set up all orders in Dynamics NAV and when we plan our production all data is transferred to ROB-EX™ Gantt automatically, and we have gained a clear graphic overview of all our orders in operation. We are able to see immediately whether we will have difficulties in delivering on time and we can adjust the plan in ROB-EX™ Gantt at once

and the changes are automatically transferred back to Dynamics NAV. Furthermore, ROB-EXT™ Gantt provides our sales people with a clear overview of our ongoing projects enabling them to see fairly accurately when they are able to promise delivery on new projects.

A VERY SIGNIFICANT SPIN-OFF

We have also experienced a very significant spin-off that we had not expected when we started the project. When the orders are keyed in, the drawing department works out detailed drawings of the units

that we are to produce, and they do this in AutoCad. Thanks to the ROB-EXT™ Gantt viewer all employees have access to viewing the production data and drawings, and if details need to be studied more closely they simply zoom in on the drawing and the given detail can, if so desired, be printed out on a printer on the shop floor.

A GOOD INVESTMENT

ROB-EXT™ Gantt has proven to be a fantastic investment for us, and we are very happy with how we are able to employ the system in our daily assignments so that we carry out our production as optimally as possible.”

A/S MIDTJYDSK BETON-vare & Elementfabrik Head of Production Anders Sørup has obtained overview of the production with the ROB-EXT™ Gantt system.

FACTS

CUSTOMER

A/S MIDTJYDSK BETON-vare & Elementfabrik , Vardevej 2, 7400 Herning

CHALLENGE

To obtain better control and overview of work in progress securing precise delivery.

SOLUTION

ROB-EXT™ Gantt integrated with MBS Dynamics NAV.

BENEFITS

- Fewer mistakes, no manual typing in plan.
- Fast and easy to reschedule.
- Much better overview of work in progress.
- Information available to all involved personnel.
